

Quality Assurance

Integrated Professional Support Services & Quality Assurance

The Triune Team has a proven Management Approach that we will use to successfully support NAVSEA Warfare Centers in all seven zones. We have customized our Management approach to meet the objectives of the Seaport-e Program. We have integrated Project Management Institute's (PMI) PMBOK™ project management principles into all aspects of our Program Management Approach, which ensures that risks are identified early, which in turn increases the predictability of delivery cost, and reduced variability in delivery schedules.

Centralized Program Management Office (PMO)

The primary responsibility of our PMO will be to provide direct technical and programmatic interface and execution accountability to the NAVSEA Program Executive Offices (PEO) and Directorates.

Integrated Program Management

Our integrated Program and task order management approach drives task planning, staffing, organizing, directing, conducting, producing, monitoring, and reporting for each task order and contract-wide programs to ensure effectiveness and on-time and on-budget completion.

Task Order Program Management System (TPM)

Our online TPM, in managing various tasks on a day-to-day basis, will support the Program Manager as well as Seaport-e Task Order Project Managers. TPM will be tied closely to ordering NAVSEA contract offices, program management and budgeting process.

Quality Assurance and Control

In order to ensure quality of services and compliance, the Team will use an established set of standards and processes with which all team members agree to conform. The principles of these two important elements are established first in the subcontracting agreements, and finally, in the QC Plan. Our standard TO management processes and risk mitigation strategies will be used to measure subcontractor performance. In addition, Triune will survey the team members on a semi-annual basis to determine the team's performance and to invite recommendations to improve the in-place organizational structure and management processes.

Reviews

Our Management Plan calls for regular status reporting as well as status review meetings with the Government. Issues will be identified and resolved promptly.
